

Printing date 21.04.2024 Version number: RO/ 26 (replaces version 25) Revision: 21.04.2024

# SECTION 1: Identification of the substance/mixture and of the company/undertaking

#### **Product identifier**

#### Trade name:

### **REMONT PRIMER 950**

Specialist, siliceous priming agent

### Relevant identified uses of the substance or mixture and uses advised against

# Life cycle stages

C/PW Consumer use / Widespread use by professional workers

#### **Sector of Use**

SU19 Building and construction work

### **Product category**

PC9a Coatings and paints, thinners, paint removers

#### **Process category**

PROC10 Roller application or brushing

PROC11 Non industrial spraying

PROC19 Manual activities involving hand contact

#### **Environmental release category**

ERC10a / ERC11a Widespread use of articles with low release

# **Article category**

AC0 Other

### Application of the substance / the preparation

Priming - Product for an industrial, technical and private use for coating building surfaces. For all other uses not recommended.

# Details of the supplier of the safety data sheet

# Manufacturer/Supplier:

KREISEL - Technika Budowlana Sp. z o.o. ul. Szarych Szeregów 23 60-462 Poznań Poland

Tel. +48 61 846 79 00 Fax +48 61 846 79 09 sekretariat@kreisel.pl www.kreisel.pl

Results of PBT and vPvB assessment

**PBT:** Not applicable. **vPvB:** Not applicable.

# SECTION 3: Composition/information on ingredients

**Chemical characterization: Substances** 

This product is a mixture.

**Mixtures** 

**Description:** 

Mixture of acrylat dispersion and fillers with nonhazardous additions.

Dangerous components:			
CAS: 1312-76-1	Silicic acid, potassium salt (M/M > 3,2)	1 - 2.5%	
EINECS: 215-199-1	(1) Skin Irrit. 2, H315; Eye Irrit. 2, H319		
REACH: 01-2119456888-17	Specific concentration limits: Skin Irrit. 2; H315: C ≥ 40 %		
	Eye Irrit. 2; H319: C ≥ 40 %		
	STOT SE 3; H335: C ≥ 75 %		

Other components (>20%):		
CAS: 7732-18-5	Water	50 - < 100%
EINECS: 231-791-2		
REACH: 1		

### Additional information:

For the wording of the listed hazard phrases refer to section 16.

<sup>1</sup> Not subject to registration in accordance with EC 1907/2006 Annex V (point 7) or Article 2.

(Contd. of page 2)

# SECTION 4: First aid measures

### Description of first aid measures

First aid

#### General information:

For first responder no special personal protective equipment is required. First responder should avoid contact with the product.

#### After inhalation:

Take affected persons into fresh air and keep quiet. Seek medical treatment in case of complaints. In case of irregular breathing or respiratory arrest provide artificial respiration. In case of unconsciousness place patient stably in side position for transportation.

#### After skin contact:

Immediately wash with water and soap and rinse thoroughly. Immediately remove all soiled and contaminated clothing. Wash contaminated clothes before reuse. Clean contaminated shoes before reuse. If skin irritation continues, consult a doctor.

#### After eye contact:

Do not rub eyes because additional damage to eyes can be caused by mechanical stress. If necessary, remove contact lenses and flush the eye immediately while holding eyelids open to water for at least 20 minutes. If possible, isotonic eyewash solution (e. g. 0,9% NaCl). Always consult an occupational physician or ophthalmologist.

### After swallowing:

Do not induce vomiting. If conscious rinse mouth with water and drink plenty of water. Consult a physician or poison control center.

# Most important symptoms and effects, both acute and delayed

Symptoms and effects are described in section 2 and 11.

#### Hazards:

No further relevant information available.

# Indication of any immediate medical attention and special treatment needed

If a physician is to be consulted, as per possibillity he should be presented this safety data sheet.

# **SECTION 5: Firefighting measures**

#### **Extinguishing media**

The mixture is flammable neither in the delivery condition not in mixed conditions. Extinguisher and fire fighting are therefore adjusted to the surrounding fire.

# Suitable extinguishing agents:

The mixture is flammable neither in the delivery condition not in mixed conditions. Extinguisher and fire fighting are therefore adjusted to the surrounding fire.

# Special hazards arising from the substance or mixture

This product is neither explosive nor flammable, and non-oxidizing with other materials. Particular danger of slipping on leaked/spilled product.

# Advice for firefighters

No special measures required. Collect contaminated fire fighting water separately. It must not enter the sewage system. Dispose of fire debris and contaminated fire fighting water in accordance with official regulations.

# according to Regulation (EC) No 1907/2006, Article 31

Printing date 21.04.2024 Version number: RO/ 26 (replaces version 25) Revision: 21.04.2024

#### **REMONT PRIMER 950**

(Contd. of page 3)

# SECTION 6: Accidental release measures

#### Personal precautions, protective equipment and emergency procedures

If appropriate, reference must be made to exposure controls and personal protection (see section 8).

#### **Environmental precautions**

Do not allow undiluted product or large quantities of it to reach ground water, water course or sewage system.

### Methods and material for containment and cleaning up

Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust). Dispose of the material collected according to regulations.

#### Reference to other sections

See Section 7 for information on safe handling.

See Section 8 for information on personal protection equipment.

See Section 13 for disposal information.

# SECTION 7: Handling and storage

# Precautions for safe handling:

Ensure good ventilation/exhaustion at the workplace. Avoid contact with the eyes and skin. Wear protective clothing. Washing facilities / Water for cleaning yes and skin should be available. Persons, who tend to skin diseases or other hypersensitivity reactions of the skin, should not handle the product. Do not eat, drink, smoke or sniff while working.

# Information about fire - and explosion protection:

No special measures required.

# Conditions for safe storage, including any incompatibilities

#### Storage:

#### Requirements to be met by storerooms and receptacles:

Keep out of reach of children. Store in cool, dry place in tightly closed receptacles.

#### Information about storage in one common storage facility:

Keep away from foodstuffs, beverages and feed.

### Further information about storage conditions:

Protect from frost. Protect from heat and direct sunlight.

# Miniumum storage life:

Minimum storage life (+5°C up to 25°C): See indication on package.

Storage class: 12

# Specific end use(s)

No further relevant information available.

# SECTION 8: Exposure controls/personal protection

# **Control parameters**

# Ingredients with limit values that require monitoring at the workplace:

The product does not contain any relevant quantities of materials with critical values that have to be monitored at the workplace.

#### Ingredients with biological limit values:

Void

Sewage plant

#### Additional information:

The lists valid during the making were used as basis.

### **Exposure controls**

# Individual protection measures, such as personal protective equipment

no hazard identified

348 mg/l (not specified)

# General protective and hygienic measures:

Use skin protection cream for skin protection. Avoid close or long term contact with the skin. Avoid contact with the eyes. Wash hands before breaks and at the end of work. Keep away from foodstuffs, beverages and feed. Do not eat, drink, smoke or sniff while working.

# Respiratory protection:

Use suitable respiratory protective device only when aerosol or mist is formed (FFP2 according to EN 149)

# Hand protection:

Hand protection: Chemical resistant protective gloves according EN ISO 374

The glove material has to be impermeable and resistant to the product. Due to missing tests no recommendation to the glove material can be given for the product. Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation. Check protective gloves prior to each use for their proper condition. Preventive skin protection by use of skinprotecting agents is recommended. To avoid skin problems reduce the wearing of gloves to the required minimum.

#### Material of gloves:

The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.

(Contd. on page 6)

# according to Regulation (EC) No 1907/2006, Article 31

Printing date 21.04.2024 Version number: RO/ 26 (replaces version 25) Revision: 21.04.2024

#### **REMONT PRIMER 950**

(Contd. of page 5)

#### Penetration time of glove material:

The exact break through time has to be found out by the manufacturer of the protective gloves and has to be observed.

# For the permanent contact gloves made of the following materials are suitable:

Polychloroprene (material thickness  $\geq 0.5$  mm; breakthrough time  $\geq 480$  min.) Nitrile rubber (material thickness  $\geq 0.35$  mm; breakthrough time  $\geq 480$  min.) Butyl rubber (material thickness  $\geq 0.5$  mm; breakthrough time  $\geq 480$  min.) Fluororubber (material thickness  $\geq 0.4$  mm; breakthrough time  $\geq 480$  min.) Neoprene (material thickness  $\geq 0.5$  mm; breakthrough time  $\geq 480$  min.)

### Not suitable are gloves made of the following materials:

Non-liquid-tight gloves made of fabric, leather or similar materials.

#### Eye/face protection:

In case of splash risk use tightly fitting safety goggles according to EN 166.

### **Body protection:**

Protective work clothing

#### Risk management measures:

An operator training/guidance in the correct use of personal protective equipment is necessary to ensure the required level of effectiveness.

#### Information about design of technical facilities

No further data; see item 7.

# **Environmental exposure controls**

Avoid release in the environment. Use the surplus or dispose it of properly.

# SECTION 9: Physical and chemical properties

# **SECTION 13: Disposal considerations**

#### Waste treatment methods

#### Recommendation:

Must not be disposed together with household garbage. Do not allow product to reach sewage system.

Risk of environmental pollution. Follow the applicable regulations on waste disposal. Keep unused products and contaminated packaging sealed. Provide containers for waste collection. Hand over for disposal to a specialist company authorised to carry out such activities. Prevent the product from being released into the environment. Do not allow the product to enter the sewage system. Must not be disposed of with municipal waste. Empty containers can be utilised for energy recovery in a waste incineration plant or, if classified accordingly, collected at a landfill site. Perfectly cleaned packaging can be recycled.

Dispose of contents/container in accordance with local/regional/national/international regulations.
